

Declared lane inputs — the five preconditions

immutable task bundle · applicable licence · pinned native runtime · native grader · sufficient budget

Precondition gate

all five verified for the declared suite?

yes — dispatch

no, or unknown ⇒ fail closed

1 · Task manifest

hash-pinned task/split IDs

2 · Execution sandbox

pinned native runtime

3 · Native verifier

official native grader

4 · Artifact capture

attempts and receipts

5 · Report

score recorded only if exact

Gate refuses dispatch

no adapter invoked

Records **BLOCKED**

declared suite unsettled

score := null, not 0

partial evidence stays partial

Adjacent benchmark

NEVER substituted

✗

External scope unavailable

private payload not included

Outcome A — suite settled

Original contract, full-suite score:

E1 SWE-bench Pro: 2/731 = 0.274% pass@1

E11 VerilogEval: 129/312 = 41.35% pass@1

Replacement scope, complete (coverage; score):

E8 LAB-Bench: 1967/1967 graded, by category

E10 AgentDojo: 97/97 run; utility 88/97

E14 Omni-MATH: 4428/4428 dispositions;

2271/4428 = 51.29% (unjudged rows = fail)

Replacement scope, scored 2026-09-27:

E1 1/190 · E2 27/45 · E5 8/97 · E9 10/34

E6 90/812 (lower bound) · E13 26.1% (255 ep.)

Outcome B — gap reported, score null

Original scope, no local or paid path

(closed external, 6 contracts):

E3 · E7 · E8 · E10 · E12 · E14

(E13-original also blocked; no closure record)

Original scope not settled:

closed partial: E4 (1/100 tasks)

(AWS quota gate E6, E9 and launch-pending

E1, E2, E5, E13 cleared on 2026-09-27.)

Fail-closed rule

Unknown states fail closed rather than defaulting to a classification.
No partial, recovery, public, harness, readiness or package-validation
evidence becomes a suite score, and no cross-suite average is formed.

All 14 lanes, ledger of 2026-09-19 updated 2026-09-

27 (one state per lane, as in the Chapter 8 lane grid):

4 complete · **6** replacement scope scored · **1** partial · **3** blocked.
